

D-25-02: Primo March – Ultimo October

Equipment: ICOM – IC- M87

Emergency radio beacon: Kannad Marine PLB - SAFELINK SOLO

Identification code:

Responsible institution

Institution: Aarhus University, Department of Ecoscience.

Company's address: Frederiksborgvej 399, 4000 Roskilde, Denmark.

Contact person: Marcin A. Jackowicz-Korczynski.

E-mail: mjk@ecos.au.dk **Tel:** +45 3141 3021.

Information on emergency contact person

Name: Marie Frost Arndal

Tel: +45 6166 7702

E-mail: mfa@ecos.au.dk

This is exclusively a permit for operational aspects of your expedition. It therefore does not represent an evaluation of safety issues related to your expedition.

Operational conditions

For the safety of your expedition you must comply with following conditions:

Before expedition start:

It is very important that the phone-number for your satellite phone and MMSI number or ID code on Personal Locator Beacon is known to the rescue authorities:

- *JRCC* jrcc@jrcc.gl and fko-a-j902@mil.dk

If the expedition brings any form of Garmin IN Reach equipment -please send a link to the rescue authorities before start of expedition.

Report start of expedition

Before setting out on the expedition, the expedition leader must report the expedition start to the rescue authorities.

Report any change of expedition

Any change of entry point/route or cancellation of the project must also be reported as soon as possible.

Report end of expedition:

After arrival at the final destination and before leaving Greenland, the *JRCC* (e-mail: jrcc@jrcc.gl and fko-a-j902@mil.dk) must be informed that the expedition has been successfully completed. The expedition leader must therefore send a written expedition end report to *JRCC*, including the date when the expedition has reached their final destination and the locality name. **The “end of expedition report” must be sent to *JRCC* no later than one day after the expedition end date,**

in your case the 19 October 2025. A possible delay of the expedition in reaching the final destination should be reported to JRCC as soon as possible. In case JRCC has not received a written end of expedition report from the expedition leader or the expeditions emergency contact person within this deadline, the authorities will initiate a search operation.

If you neglect to inform JRCC about your expedition start/change of route/end, you will not be able to obtain an expedition permit later on.

In case of emergency

- Activate your PLB.
- Use any means of communication to establish contact with a relevant rescue coordination centre (see Annex 3 for selected local police stations).

Flying and landing in Greenland

Flying and landing in Greenland requires a technical and operative permit *Ministry of Housing and Infrastructure*, fly@nanoq.gl. The airline company responsible for the transport should apply for the permit and not expedition members. Flights over protected areas should stay more than 500 m above the terrain except in connection to landing and take-off. See procedure for flying and landing in the National Park on www.naalakkersuisut.gl/expeditions.

Permits

A copy of the present permit, and additional permits related to the expedition, must be carried by each field party of the expedition and must be presented upon request to any official authority in Greenland. Authorities are allowed to inspect the expedition in order to assess whether Greenlandic rules and regulations are adhered to.

Note that, according to section 11 in the Executive Order on Access to and Conditions for Traveling in Certain Parts of Greenland, this permit may be revoked by the Ministry of Agriculture, Self-Sufficiency, Energy and Environment or the Chief Constable of Greenland. The permit may be revoked, for example, if the expedition is deemed reckless on the basis of new and important information or implies violations of the rights of the State, the Government of Greenland or any third party.

Special attention

The expedition members must follow the environmental requirements as stipulated by the Section of Environment, under the Ministry of Agriculture, Self-Sufficiency, Energy and Environment.

General conditions

Legislation

The expedition must comply with existing Greenlandic legislation. The expedition leader is responsible for making sure that all expedition members are aware of all relevant regulations in the

areas covered by the expedition. Particularly relevant for the area covered by this permit are regulations concerning nature conservation, environmental protection and conservation of prehistoric as well as historic relics.

Flora and Fauna

Nature conservation is regulated in the Act No. 29 of 18 December 2003 on Nature Conservation and executive orders on protected areas and species. The permit is given under the condition that disturbances of flora and fauna are kept to a minimum. Visitors should also be aware that some wildlife species can be dangerous and seriously injure or kill people. These include polar bears, walrus and musk oxen.

Environment and waste handling

Environmental protection is regulated in the Act No. 16 of 1 December 2021 amending the Environmental Protection Act No. 9 of 22 November 2011. Expedition leaders must address protection of the natural environment when planning and preparing a project in order to minimise potential negative impacts of the expedition. Care must be taken to avoid any spill of oil, fuel and other environmentally hazardous materials. Expeditions must use spill trays and bring equipment for the clean-up and storage of polluting or polluted materials.

Expedition teams must thoroughly clean the project area before departure. Waste must be brought to a nearby town or settlement for final disposal. Any storage of material or equipment will need a separate permission from the Government of Greenland.

Vulnerable cultural sites

Please be aware that there are specific prerequisites and conditions for accessing certain heritage sites in the Northeast National Park. These sites are listed in Annex II and can be download from our expedition homepage under **Procedure and Forms / Additional Permits**. For further information or questions regarding the rules protecting vulnerable cultural heritage or access to specific heritage sites in the Northeast National Park please contact the Greenland National Museum and Archives:

Phone +299 322611
e-mail: nka@natmus.gl

Protection of cultural sites and artefacts

The protection of ancient and historic cultural remains in the National Park is regulated under Act no. 11 of 19 May 2010 om fredning og anden kulturarvsbeskyttelse af kulturminde. When encountering objects of cultural, historic, or archaeological significance*, please be aware of the following:

- **It is strictly prohibited to pick up or disturb, collect, remove, or manipulate any man-made objects, feature, construction or historic building.** This includes the removal or manipulation of stones and rocks, soil, or other components associated with a feature, construction, building or monument.

- **It is strictly prohibited to** build campfires, disturb vegetation, or alter any part of an area within a 50m radius (100m radius in the National Park) of a man-made monument, building or construction of cultural, historic or archaeological significance.
- **It is strictly prohibited to** use historic buildings, constructions and monuments as sleeping quarters, waste dumps or depots.

*Objects of cultural, historical or archaeological importance include ruins of peat/stone houses, foundations for tent houses, tent rings, Paleo-Inuit structures, graves, depots, animal traps, cairns, hunting blinds, historic wooden huts and abandoned machinery and military equipment.

Geological items and preserved biological material

Items of ancient botanical, zoological or geological origin (e.g., sub-fossils and fossils, meteorites, animal remains, ancient driftwood, and paleo-botanical remains) may not be collected without prior authorization by the Greenland National Museum and Archives. An application permit for sample collection of the above mentioned categories in Greenland is available at <https://en.nka.gl/applications-and-forms/application-for-general-scientific-field-research-in-greenland/>.

Military stations

Military stations are restricted areas. Expeditions cannot expect to visit these stations without permission from the *Joint Arctic Command* (see JRCC in Annex 3 for contact details).

Expeditions are not allowed to enter huts established by *the SIRIUS sledge patrol*. Should an emergency situation require any use of any military facility, the place must be left in clean and good condition. Use of any military huts and any use of fuel or provision stored at the facility should be reported immediately to the *Joint Arctic Command* (see JRCC in Annex 3 for contact details). Be prepared to reimburse the Joint Arctic Command for the costs of replenishing the depot.

Research stations

Research stations on the ice cap cannot be visited without permission from the station manager. Should an emergency situation require such buildings to be used, the place must be left in clean and good condition. Any use of fuel or provision stored at the facility should be reported immediately to the police. Be prepared to reimburse the owner for the costs of replenishing the depot.

Report

The expedition leader is obliged to send a report to the Government of Greenland, *Ministry of Agriculture, Self-Sufficiency, Energy and Environment*, e-mail: ekspeditioner@nanoq.gl or P.O. Box 1015, DK 3900 Nuuk, Greenland. The report format can be downloaded from the expedition web-site, www.ExpeditionsGreenland.gl and should be sent no later than 31 December.

Any scientific publications based on the activities of the expedition should be sent to the Research Coordinator in the *Ministry of Education, Culture, Sports and Church*, e-mail: IKIN@nanoq.gl or P.O Box 1029, 3900 Nuuk, Greenland.
